### **PRINCIPLES**

# FOR CONSIDERATION OF PROPERTY TAX ABATEMENT IN LAFAYETTE, INDIANA

These principles are used in determining the <u>guidelines</u> and <u>considerations</u> for each category of project, and will also be used in determining the length of an abatement within each category.

- 1. Firms receiving tax abatement are expected to give local construction firms and local suppliers of goods and services the opportunity to do business.
- 2. Existing industry will be considered for tax abatement on the same basis as firms being recruited to the community.
- 3. Preference will be given to firms that diversify and fill gaps in our local economy rather than those that compete for business in the local economy with existing firms.
- 4. Products that are sold outside our local community and bring value to the local economy will be given a high priority.
- 5. Abatement will be used to recruit and assist firms that create a technology based product or service or use advanced technology in manufacturing.
- 6. Location in the downtown, the urban enterprise zone, or declining area designated as an economic development area will be given a higher priority.
- 7. Projects that involve retail or are primarily office operations will be considered only in the locations described in #6 above unless the office operations are technology related.
- 8. The number of jobs created per dollar of investment will be an important consideration for the warehouse distribution and manufacturing areas.
- 9. The level of wages and benefits will be an important consideration for all applications.
- 10. Housing will be evaluated in terms of percentage of units available to lower income families, mix of income levels, distance from other projects serving a similar clientele, availability of services, potential displacement of existing housing, and compatibility of design.
- 11. Projects will not be considered that will require variances or special exceptions unless primary review indicates that no problems will be encountered.
- 12. Adverse environmental impacts will negatively affect the consideration of abatement.
- 13. Any need for additional public infrastructure or other additional public support in the project will be considered in determining the length of the abatement.
- 14. Major development projects will be individually evaluated.
- 15. The time period of depreciation of equipment will be considered in the length of abatement for equipment.
- 16. Economic Revitalization Areas (ERAs) designated by the Common Council for new manufacturing equipment will include a Memorandum of Understanding that will provide for the repayment to the City of all or a portion of the tax savings realized through the designation in event that the ERA is terminated because the new manufacturing equipment is removed from the City.
